WELCOME NOTE

AHMED SALEH BAABOOD
Executive Chairman

MELWIN D'CUNHA
CEO

We would like to extend a warm welcome to all the Sponsors, Supporters, Exhibitors, Partners, Visitors and Media to the 9th Edition of OFSEC 2025 - Oman's Only and Most Comprehensive Exhibition on Fire, Safety and Security.

OFSEC is designed to meet the needs of the local, regional and international markets by linking practitioners, suppliers, distributors and manufacturers from the fire, safety and security industry, with key decision makers from the government and private sectors, making it a definitive networking platform, where new projects and partnerships are initiated and visionary objectives are implemented. This event also aims to create synergy and strengthen the collaboration between the authorities and the industries.

The main objective of the Exhibition is to encourage productive discussion, networking and exchange of knowledge between the Government, industrial and commercial entities, aviation, construction, infrastructure, transportation, manufacturing, oil and gas and utilities sectors.

We have carefully selected the finest industry experts to speak at this Summit, thereby giving everyone the opportunity to hear first-hand experiences from ministries, research institutions and industry leaders. The Agenda is meticulously designed with elaborate case study presentations, networking meetings, problem solving sessions and interactive panel discussions to focus on current market trends, technological advancements based on Fire and Safety Standards and regulations.

We wish one and all a successful participation in the Exhibition. We are confident OFSEC, will serve as a platform to strengthen local and international business engagement, encourage investment and continuous growth.

11 NOVEMBER 2025 DAY 1 – AGENDA

10:00 WELCOME NOTE

10:00

Amjad Masoud AlMamari
Fire & Safety Inspector
Petroleum Development Oman
Topic: Water Management

10:30

Lieutenant Colonel / Omair Abdulaziz Al Rawahi
Director of Security Advisory
Royal Oman Police
Topic: Regulatory and Procedural Aspects of Security for Facilities and Critical Infrastructure

10:50

Eng. Salma Al Ali
Head of Engineering Drawings Section
Directorate of Dubai Civil Defense

11:10

Eng. Dana Kamal
Director, International Development MENA
National Fire Protection Association (NFPA)
Topic: Building Safety ; A Roadmap for Fire Safety During Construction Projects under NFPA 241

11:30

PhDr. Alexandra Janeekova
Head of Crisis Management Department - Office of the Minister
Ministry of Foreign and European Affairs of the Slovak Republic
Topic: Emergency Response and Crisis Management

11:50 PRAYER BREAK

12:10

Major Hamad Subah Al-Swar
Director, Crises and Disaster Management Directorate
Ministry of Interior, Kingdom of Bahrain

11 NOVEMBER 2025 DAY 1 – AGENDA

12:30

Khalid Al Wahaibi
Vice President QHSSE
OQGN
Topic: From Sky to Safety: Leveraging Advanced Technologies for Safer Operations and Effective Emergency Management

12:50

Gijsbert van Pinxteren
Business Unit Director
RelyOn Nutec Fire Academy
Topic: Future Competences for Emergency Response Organisations

13:10

Dr. Musaed Alnajjar
Security Advisor
Insan Co. for Consultation and Training, Kuwait
Topic: The Prevalence of PTSD among Emergency Responders

13:30

Dr. Ahmed Zayed Al Shaqsi
General Manager Strategy
Nama Electricity Distribution
Topic: From Compliance to Culture: Building a Performance-Driven HSE Organization

13:50

Wail Al Muharzi
Managing Director
Aman International
Topic: Target Operating Model for Fire Engineering Services

14:10

Salma Nasser Al Harrasi
Business Development Manager
Blue Line United
Topic: Efficiency of Training vs. Competency Outcome

14:30

CLOSING REMARKS

12 NOVEMBER 2025 DAY 2 – AGENDA

10:00 WELCOME NOTE

10:10

Chip Hlavacek
Director of Support Services
Priority Dispatch Corporation
Topic: Zero Minute Response

10:30

Captain Ahmed Abdullah Al Ghafri
Geographic Information Systems Specialist
Royal Oman Police
Topic: The applications and security precautions of unmanned aerial vehicles (drones) concerning safety and the legislative frameworks regulating

10:50

Ahmed Yousry
Senior Business Development Associate
Dubai Civil Defense's Emirates Safety Laboratory
Topic: Fire Doors: From Compartmentation to Certification

11:10

Waleed Al Mahrizi
HSE Support Principal
OQ
Topic: Emergency and Crisis Management

11:30

Kim Myers
Principal Security Consultant
WSP
Topic: From Risk to Readiness: Futureproofing for What Comes Next

11:50 PRAYER BREAK

12:10

Oliver Newman
Regional Manager | Explosion & Detection Solutions
Fike Corporation
Topic: Fike – Explosion Protection Fundamentals

12 NOVEMBER 2025 DAY 2 – AGENDA

12:30

Kevan Whitehead
Managing Director
Unity Fire & Safety Services LLC
Topic: How does your Fire Kit work?

12:50

Johan Kramer
Sales Manager
Hytrans Systems
Topic: Mobile Water Transport Systems

13:10

Amr Mahmoud
Field Business Supervisor
UL Solutions
Topic: Understanding ongoing inspection requirements for your UL Certifications

13:30

Roy Savio Fernandes
Technical Director
Tenable Fire Engineering Consultancy
Topic: Unique Fire Protection Challenges in Healthcare Facilities

13:50

Ali Ali
Manager
908 Devices
Topic: 908 Devices – Analysis at the speed of life

14:10

Dr. Neelesh Sogani
IOSH Oman Chair / GM HSE-ZPTE
IOSH Oman
Topic: From Risk to Readiness: Climate-Resilient Safety Systems for Industrial Workforces

14:30

Nicholas Dulley
General Manager
JSP Safety FZE
Topic: Innovation and Development in the PPE space – How companies can help to reduce their costs whilst developing robust safety policies that are fit for purpose

14:30

CLOSING REMARKS

SPEAKERS

Ahmed Yousry

Senior Business Development Engineer
Dubai Civil Defense's Emirates Safety Laboratory

Ahmed Yousry is a dedicated professional with extensive experience in the fire and life safety industry, currently serving as a Senior Business Development Associate at Dubai Civil Defense's Emirates Safety Laboratory. Ahmed leverages his expertise in fire safety engineering, strategic planning, and business development to enhance organizational performance, foster growth, and strengthen key industry partnerships.

Throughout his career, Ahmed has excelled in roles such as Senior Fire Protection Design Engineer for renowned consultancy firms, where he successfully designed and implemented innovative fire protection solutions. His commitment to industry excellence, combined with his ability to develop strategic relationships, positions him as a valuable contributor to the advancement of fire safety standards and operational effectiveness. Ahmed holds a Master's degree in Engineering Systems Management from the American University of Sharjah and a Bachelor's degree in Mechanical Engineering. This robust educational background, complemented by his substantial practical experience, equips him with a comprehensive understanding of fire safety engineering, regulatory compliance, and business management practices tailored specifically for the fire and life safety sector.

PhDr. Alexandra Janeekova

Head of Crisis Management Department - Office of the Minister
Ministry of Foreign and European Affairs of the Slovak Republic

Alexandra Janeekova, current Head of Crisis Management at the Ministry of Foreign and European Affairs of the Slovak Republic, has been actively engaged in the field of humanitarian aid and crisis management for the last 6 years. She has successfully organized various evacuation operations from abroad, especially from the Middle East. Currently she is focusing mainly on strengthening crisis preparedness.

Ali Ali

Manager
908 Devices

Experienced Area Sales Manager with a demonstrated history of working in the research industry. Strong sales professional skilled in Safety and security solutions, Capital Equipment, Life Sciences, and Sales Management.

SPEAKERS

Amjad Masoud AlMamari

Fire & Safety Inspector
Petroleum Development Oman (PDO)

Amjad Masoud AlMamari is a seasoned Fire & Safety Inspector at Petroleum Development Oman (PDO) with over 12 years of experience in the petrochemical industry. He dedicated nine years to operational fire service. Amjad has focused on fire prevention, supporting projects, and developing proactive pre-incident plans. His extensive experience in industrial safety underpins his commitment to advancing effective Water Management strategies and sustainable safety solutions.

Amr Mahmoud

Field Business Supervisor
UL Solutions

Amr has 14 years' of experience in Fire Protection in the Middle East and North Africa for International Design Firms and experience in Hydrocarbons, Infrastructure, Buildings, and Industrial. He is currently Field Business Supervisor for Middle East and Africa. Amr Mahmoud holds a M.Sc. degree in Fire Protection from Helwan University and is registered as a Professional Engineer from the Texas Board of Professional Engineers and New York State, USA.

Captain Ahmed Abdullah Al Ghafri

Geographic Information Systems Specialist
Royal Oman Police

Bachelor's in Geographic information systems from Sultan Qaboos University

An expert in:

- Spatial data analysis and processing.
- Designing digital maps and geospatial databases.
- Proficiency in GIS software (ArcGIS, QGIS, ERDAS).
- Remote sensing and satellite image analysis.
- Analyzing drone threats, developing defensive strategies, and coordinating operations with security teams to ensure the protection of civilian, military, and critical infrastructure, as well as public events.
- Deploying counter-drone systems based on safety protocols and legal regulations.
- Applying technical and analytical skills in counter-drone operations to protect critical infrastructure and ensure public safety, while complying with local and international legal and regulatory frameworks.

SPEAKERS

Chip Hlavacek
Director of Support Services
Priority Dispatch Corp

Chip Hlavacek is currently the Director of Support Services and manages MEAA (Middle East, Africa, and Asia) support processes and infrastructure for Priority Dispatch Corp. based in Salt Lake City, UT. Chip previously held the position of Director of Client Support and is a Retired US Marine Corps Ammunition Officer and paramedic. With over 20 years in public safety, Chip has been a police officer, a Paramedic, and was the Communications and Technology Manager and an Assistant Director for Charleston County EMS, Charleston, SC. Chip has been a Microsoft Certified Systems Administrator, an Emergency Medical Dispatch (EMD) Instructor, an EMD Quality Improvement Instructor, and a ProQA and AQUA Software Trainer.

Dr. Ahmed Zayed Al Shaqsi
General Manager Strategy
Nama Electricity Distribution

Dr. Ahmed Al Shaqsi is an energy sector leader with over 20 years of experience in power distribution, senior HSE management, renewable integration, and strategic planning. He chaired Nama Group's Senior HSE Management Committee and now leads strategy and sustainability at NEDC. He holds a PhD in Renewable Energy Policy & Economics.

Dr. Musaed Alnajar
Security Advisor
Insan Co. for Consultation and Training, Kuwait

Currently working as a Security Advisor for Insan Company for Training and Consultancy.

Dr. Neelesh Sogani
IOSH Oman Chair / General Manager HSE Training Development
IOSH Oman Community / Al Tasnim Enterprises LLC

Dr. Neelesh Sogani with his calm, composed, and vigorous demeanour radiates the exuberance of nearly three decades of flabbergasting experience in leadership positions. He is a dynamic senior Management

HSE Professional with magnanimous expertise in Process, Oil & Gas, Construction, and Infra Industry. Spanned across India, North Africa & Middle East. Currently working as General Manager HSE Training & Development for Al Tasnim Enterprises LLC. Due to his remarkable attributes, he is also serving the region as RoSPA Regional Ambassador and Chair of IOSH Oman besides being an IOSH Council Member.

Dr. Sogani stands apart due to his cognition in addressing International, regional, and local Conferences. He is also acknowledged as a panellist speaking on Motivation, HSE, ESG, Road Safety, and many more campaigns and Roadshows. His incredible

SPEAKERS

contribution to the sector is evident through the extensive array of articles and technical presentations. His credibility is highlighted by the string of International, Regional, and National Awards in the field of HSE & CSR including the Global Achievers Award 2025 from Global Youth Community at Dubai, British Safety Council, American Society of Safety Engineers, Construction Week, Oman Society of Contractors, Dossier, Global Excellence Award 2021, etc. He is a Chartered Fellow of IOSH, a Fellow Member of IIRSM, and a Doctorate in Management Studies and is connected to several professional bodies through his work and these synergies are also beneficial to OSH members. His opinion and input are sought and service is provided on a local, national, and international basis. Dr. Sogani has worked in several complex work environments since the beginning of his career; his current role involves the understanding of OSH within the energy generation sector. To satiate his appetite for intriguing challenges, he led and set up his own companies without any Godfather or monetary support. Capable of working under the stressful ambiance of deadlines of the construction business he has set a benchmark of transformational plans. His thought processes have significantly motivated his team to achieve the targets. Translating the vision and strategy into actionable and achievable plans is his forte. His impressive experiences across diverse industries and verticals have sharpened his skills in strategizing Go-to-market strategies, implementation of processes, and Networking. Dr. Sogani has diligently displayed his talents in numerous verticals.

Eng. Dana Kamal
Director, International Development MENA
National Fire Protection Association (NFPA)

A Healthcare Engineering expert, professional and engineer with over 22 years of experience in healthcare business development, projects facilities and education across several workstreams. implementing new strategies with existing and new stakeholders and serves as NFPA – Director International Development (MENA) to cover regulatory, legislative, and technical circles and other. Work closely with multiple sectors to champion building, life safety and fire protection standards, and promote effective code compliance in the built environment, Dana managed and achieved the establishment of NFPA first International Regional Office in MENA; In addition ; Dana led the partnering with key likeminded stakeholders and industry partners; Dana proudly have been nominated for Women Trailblazers in Security and Fire Safety Awards and achieved Highly commenced rank as award winner at Intersec Dubai 2024 Awards; as well as w a winner among Global 200 Women Power Leaders 2025- Healthcare Engineering & Fire and Life Safety Industry. Dana holds a bachelor's degree in biomedical engineering and a master's degree in healthcare management. In addition, she holds certifications of NFPA Life Safety code101 and certificates of Healthcare Safety, Emergency Management &Response, and Fire Safety Management by the International Board for Certified Safety Managers IBFCSM, USA. Hospital planning and design by e-Cornell University and an Executive Director diploma by IMAC. Dana is a trusted and active member as well in American Society of Healthcare Engineering ASHE and American Hospital Association AHA.

SPEAKERS

Eng. Salma Al Ali
Head of Engineering Drawings Section
Dubai Civil Defense

Eng. Salma is a dynamic professional in the fields of Architecture Engineering, Urban Planning, and Fire Protection. With a Bachelor's degree in Architecture Engineering from the United Arab Emirates University, she has a solid foundation. Salma's journey continued with a Master's degree in Security and Strategic Studies from the American University in the Emirates. Her multifaceted expertise spans from master planning and urban design to firefighting system evaluation and risk management. As a Certified Fire Protection Specialist (CFPS), she excels in ensuring safety. Salma envisions a future where her expertise in safety, sustainability, and security converges with cutting-edge technologies like AI and IoT to create smarter, safer urban environments.

Gijsbert van Pinxteren
Business Unit Director
RelyOn Fire Academy

Gijsbert van Pinxteren is an accomplished leader in the field of Emergency Response and currently serving as the Business Unit Director at RelyOn Fire Academy in Rotterdam, The Netherlands.

With over three decades of experience with Incident response, Incident Command and Fire prevention, Gijsbert transitioned to the business side of the Emergency Response industry in 2016 and joined the largest fire training facility in Europe; Falck Fire Academy. His extensive background in Emergency response and Fire safety, has equipped him with a deep understanding of incident management and command, risk management, and compliance with Seveso guidelines.

Gijsbert holds a bachelor degree in HR and Fire Safety Engineering, which provided him with a solid foundation in the principles of leadership, development programs, fire dynamics, risk assessment, and emergency response planning.

Johan Kramer
Sales Manager
Hytrans Systems

A 56-year-old professional, he graduated in 1996 as a mechanical engineer from the University of Applied Sciences Utrecht and earned a bachelor's degree in business administration from the University of Applied Sciences Amsterdam the same year. Throughout his career, he has focused on delivering technical solutions to complex challenges in close cooperation with end users. Since 2009, he has worked at Hytrans Systems, where he is responsible for the sales of mobile water transport systems. His work spans across the Middle East, Europe, the Americas, and Africa, combining technical expertise with a strong customer-oriented approach.

SPEAKERS

Kevan Whitehead
Managing Director
Unity Fire & Safety Services LLC

Kevan Whitehead is owner and Managing Director of Unity Fire and Safety Services LLC, based in Muscat in the Sultanate of Oman. The key areas of focus are the provision of professional Fire Firefighters, Consultancy, Training and Firefighting Equipment/PPE. A career Fire Officer with over 40-years' experience in both municipal and industrial fire services with significant involvement in Europe, the Middle East and the USA. A recognised specialist and expert in Firefighters PPE and Firefighting Foam. He has been active in challenging the environmental impact of firefighting foam for over two decades and has co-organised five international conferences to debate and challenge the status quo. Panel Member of the United Nations IPEN F3 Panel, 9th Stockholm Convention, Change from Fluorine based foams to Fluorine Free foams is now gathering pace within industry, as such the disposal solutions for older foam stocks must become a key challenge. The global network of like-minded stakeholders and the willingness to share knowledge supports this process.

He now provides professional fire & rescue services to industry, predominantly in the Middle Eastern oil business in both upstream and downstream activity. He continues to work with some of the largest International Oil Companies [IOC] in the world and the all largest National Oil Companies [NOC] in Oman.

Unity is now the largest provider of professional private fire services within the Sultanate of Oman and a trusted partner with both International and National Oil companies, known for straight talking, honest, ethical and realistic solutions.

Unity have recently been awarded a major 11-year contract to provide a professional fire service to over 30-tenant companies within a major deep-water port in Oman. The first of its kind in Oman and a model for all Port and Industrial Free zone. A key principle was to provide a swift emergency response to sites falling into SEVESO /COMAH categorization. Like many countries, Omani is committed to ensuring Industry is not wholly reliant on Government Civil Defence resources, Unity fills this gap, in a cost effective and efficient manner. Unity will develop a Fire Station, and provide Fire Trucks, a small Training Centre, along with workshops and foam testing laboratories. The risk profile is diverse ranging from Down Stream Petrochemical, Metals, Food Clusters, Container Port, Ship Firefighting and General Cargo Maritime Services plus several Power Stations and Water desalination plants. The list of credible scenarios is vast. Unity are one of the few organisations in the world who can truly provide such turn-key solutions to Industry.

Khalid Al Wahaibi
Vice President QHSSE
OQGN

Khalid Al-Wahaibi is the Vice President of Quality, Health, Safety, Security, and Environment (QHSSE) at OQ Gas Networks (OQGN), where he champions a culture of zero harm through innovative safety management and

SPEAKERS

operational excellence. With a rich background as General Manager HSSE at OQ8 and extensive experience across leading Omani energy and water institutions, Khalid integrates strategic leadership with a deep commitment to protecting people, assets, and the environment. Holding an MSc in Project Management from the University of Liverpool and a BSc in HSE Management from the University of Central Lancashire, Khalid combines academic excellence with practical expertise.

Kim Myers

Principal Security Consultant
WSP

During her ten years of security risk management in the UAE with experience across government and commercial projects. Kim is not only a specialist in security planning and design, but also risk management strategies aimed at enhancing operational capability through business continuity & crisis management protocols ensuring effective response, and return to operations following unplanned events.

Lieutenant Colonel / Omaid Abdulaziz Al Rawahi

Director of Security Advisory
Royal Oman Police

Lieutenant Colonel/ Omaid Abdulaziz Alrawahi is Director of Security Advisory - Directorate General of Operation at Royal Oman Police.

Over (22) years of experience in the fields of security management, protection, and strategic consulting.

- Extensive experience in security risk assessment and the development of physical and technical protection plans.
- Specialized in designing and implementing security strategies for critical facilities and infrastructure.
- Expert in corporate security policies, procedures, and compliance frameworks.
- Skilled in integrated surveillance and control systems.
- Consultant in threat analysis, emergency response planning, and crisis management.
- Delivered numerous training programs and workshops in physical security, risk management, and information protection. Organized:
 - 3rd symposium on security of vital installations 2008
 - 4th symposium on security of vital installations 2016
 - Sur Forum on Security of Vital Installations 2019
- Supervised the development and execution of security plans for vital and government facilities.
- Contributed to the creation of standardized security and safety procedures.
- Participated in national initiatives aimed at enhancing security and technological resilience.

SPEAKERS

Major Hamad Subah Al-Swar

Director, Crises and Disaster Management Directorate
Ministry of Interior, Kingdom of Bahrain

Major Hamad Subah Al-Swar of the Bahrain Ministry of Interior is a distinguished leader in disaster management, holding an MSc in the field. With two decades of experience within the Ministry and Civil Defence, he currently serves as the Director of the Crises and Disaster Management Directorate and heads the executive office of the National Disaster Management Committee. Nationally, Major Swar plays a crucial role in fortifying Bahrain's resilience through strategic planning and implementing robust emergency response systems, emphasizing data-driven decision-making and efficient coordination. Regionally and internationally, he fosters partnerships to enhance disaster risk reduction and community safeguarding, contributing to global efforts in crisis management.

Nicholas James Dulley

General Manager
JSP Safety FZE

Nicholas has been in the safety industry for nearly forty years across all industrial segments, with a focus in particular on workplace safety, having held positions with both Nederman and JSP Safety for the last 35 years. Nicholas is based in Dubai having setup JSP Safety's wholly owned warehouse and innovation hub in JAFZA and also responsible for JSP's own manufacturing facility now based in the Sharjah Saif Zone. JSP Safety is now the largest independent manufacturer in Europe of head protection (*ref: Frost and Sullivan) with factories in Germany, UAE, UK and USA as well as sales offices worldwide. They are a specialist manufacturer of "above the neck PPE) and unique in their approach to the markets they serve, having their very own R&D facilities based in the head office close to Oxford city in the UK.

Oliver Newman

Regional Manager | Explosion & Detection Solutions
Fike Corporation

Oliver Newman is the Regional Manager – Explosion & Detection Solutions at Fike Corporation (MEIA), based in Dubai, UAE. With over 16 years of industry experience, Oliver has led technical and commercial efforts across the UK and Middle East, specializing in fire protection, explosion prevention, and detection systems. He holds certifications from NFPA, IECEx, and has formal training in project management. Oliver brings deep expertise in electrical engineering, CAD design, and combustible dust compliance. A former National Committee Member of IFEDA, he is a passionate advocate for advancing safety standards and engineering excellence in high-risk environments.

SPEAKERS

Roy Savio Fernandes

Technical Director

Tenable Fire Engineering Consultancy

With over 19 years of experience in fire and life safety, Roy Fernandes has built an extensive portfolio delivering specialist fire and life safety strategies across the Middle East, Europe, Africa and India. His expertise includes fire life safety design, preparation of fire strategy reports, finalising project proposals, managing project budgets, site supervision, presenting fire life safety strategies and managing end user relationships. He also brings deep technical knowledge in code consulting, fire alarm and voice evacuation system design, testing and commissioning and life safety system audits.

Roy has successfully managed projects for some of the world's leading hospitality brands, including Hilton, Hyatt, Marriott, Four Seasons, Mandarin Oriental and IHG, as well as retail and mixed-use developments, airports, healthcare facilities, theme parks and data centres. He is highly proficient in global and regional codes and standards, including NFPA, UAE Fire and Life Safety Code, Saudi Building Code, IBC, NBC and local codes across Bahrain, Kuwait and Qatar.

As Technical Director at Tenable Fire Engineering Consultancy, Roy leads the delivery of fire and life safety strategies for major hospitality projects as well as giga and mega-developments across the region. His work emphasises technical excellence, regulatory compliance and client collaboration, ensuring safe, sustainable and resilient built environments.

Roy is a published author on fire suppression, passive fire protection and sustainable approaches to fire safety, and he regularly shares his expertise as a speaker at leading international conferences. In recognition of his contribution to the field, he was named Engineer of the Year at the 2024 Construction Innovation Awards in Dubai.

Salma Nasser Al Harrasi

Business Development Manager

Blue Line United

Salma Al Harrasi is a dedicated professional in the field of firefighting and emergency response, with over six years of hands-on experience.

A graduate of Cardiff University, she has contributed to numerous projects across the government and oil & gas sectors, focusing on enhancing safety standards and operational readiness. Her passion lies in raising awareness about the importance of adequate training and competency development for firefighting and emergency response teams. Through her work, Salma continues to advocate for building safer, more resilient organizations through effective preparedness and professional excellence response, with over six years of hands-on experience. A graduate of Cardiff University, she has contributed to numerous projects across the government and oil & gas sectors, focusing on enhancing safety standards and operational readiness. Her passion lies in raising awareness about the importance of adequate training and competency

SPEAKERS

Wail Al Muharzi

Managing Director

Aman International

Organizational Management experience includes Leadership role positions such as Technical Director of Fire Protection Engineering, Managing Director of Fire Protection Engineering Consulting firm spanning approx. 17 years. Licensed and certified fire protection engineer experienced in fire protection and life safety engineering experience in aviation, oil and gas, industrial, residential, hospitality, healthcare, tunnels, military facility, ports, codes and standards and procedure development and training. Experience in building code life safety analyses, design of fire protection systems, fire and egress modeling of buildings and road and pedestrian tunnels, and risk analysis, managing and facilitating projects and activities relating to the topics of fire alarm/detection, sprinkler and other suppression, building life safety, public education and human behavior, and other topics such as financial performance, manage a team of project managers and an administrator, strategic plan, global expansion of the organization, creating technical documents. SUPPORTED BY

Emirates Safety Laboratory

Emirates Safety Laboratory (ESL) is an internationally accredited third-party Fire Testing Laboratory and Certification Body specializing in fire safety, construction products, and building materials.

Our goal is to facilitate market access to global companies by providing conformity assessment activities and ensuring safety and compliance.

Why ESL:

- ESL is the first national laboratory and conformity assessment body (CAB) providing fire, electrical & safety testing, and certification services managed by Dubai Civil Defence (CD)
- ESL is listed, recognized & approved across the UAE, the GCC, MENA, and Asia
- ESL is capable to test more than 100 standards & certify more than 600 standards
- ESL is the only CAB in the greater Middle East, North Africa, and Indian subcontinent making 100% of the technical decision in the region
- ESL provides indoor testing that is not subjected to extreme outdoor heat and humidity
- ESL offers test specimen installation set-up areas that are climate-controlled (indoor)
- ESL is the only test facility in the region to use environmental containment controls to mitigate harmful smoke entering the atmosphere
- ESL delivers fast and easy services for customers at competitive prices

ESL is accredited by IAS, GAC, EIAC and approved by SASO & SABER

ESL is an EGOLF & ASFP member and a notified body by MOIAT

STRATEGIC PARTNER

Petroleum Development Oman

Petroleum Development Oman (PDO), Fire and Rescue Service (F&RS) is dedicated to ensuring the safety and protection of life, property, and the environment for all PDO operations. Their highly trained teams respond swiftly to emergencies, including oil and gas fires, hazardous material incidents, and multiple rescue operations. Equipped with modern firefighting technologies and rescue techniques, they play a vital role in maintaining a safe working environment across PDO's oil and gas fields, airports and facilities. They provide emergency cover from Mina Al Fahal in the north to Harweel in the south of Oman. This includes responding to serious road traffic accidents using specialized rescue equipment to free trapped persons and rescuing people from high structures using special rope rescue techniques. The fire teams have also conducted multiple rescues from wadis during severe flooding in some areas. PDO F&RS also provide Fire Prevention and HSE advice. In addition to the existing Aviation Fire Training Simulators at Marmul and Fahud Fire Training Centre's, a new Industrial Fire Training Centre has been developed at PDO Mina Al Fahal Fire Station, JOIFF accredited Industrial Training courses, will be available to other Oil & Gas providers in Oman and throughout the ME Region.

POWERED BY

National Fire Fighting & Safety Systems LLC (NAFFCO Oman)

NAFFCO Oman, a proud sister concern of NAFFCO Dubai, was established in 2016 to expand and strengthen our presence in the Sultanate of Oman. As part of one of the world's leading manufacturers and solution providers in fire protection, we bring advanced expertise and innovation across a wide spectrum of life safety solutions, including:

- ❖ Firefighting Equipment
- ❖ Fire Alarm & Protection Systems
- ❖ Fire Trucks, Airport Rescue & Firefighting Vehicles (ARFF), and Rapid Intervention Vehicles (RIV), Ambulances, Security Systems,
- ❖ Safety Engineering From initial design to final commissioning, NAFFCO Oman delivers turnkey fire protection solutions, backed by comprehensive maintenance contracts, reliable after-sales service, and expert technical training on our full range of products.

In alignment with our commitment to sustainability, we are proud to offer our ROP-approved Fluorine-Free SFFF 3% Foam Concentrate a safer, eco-conscious alternative for modern firefighting challenges.

We are also proud to introduce a first-of-its-kind in the region: NAFFCO SMART SAFE CITY SOLUTION.

This centralized platform enables real-time monitoring and management of fire and life safety systems across buildings, facilities, or even entire cities. By integrating fire alarms, suppression systems, and emergency response mechanisms into a single command center, it ensures faster detection, smarter assessment, and more effective response to incidents such as fires, smoke, gas leaks, and other critical hazards.

Together, we are building a safer, smarter, and more sustainable future.

LEAD SPONSOR

Middle East Wealth's LLC

Middle East Wealth's LLC, established in 2008, is a leading Omani company specialized in fire protection, safety, and engineering solutions. The company provides comprehensive services including design, engineering, supply, installation, testing, commissioning, and maintenance of fire alarm and firefighting systems, fire suppression systems, and fire-rated doors.

Our expertise also extends to servicing and refilling of fire extinguishers, supply of breathing apparatus, and provision of high-quality personal protective equipment (PPE). With extensive experience, Middle East Wealth's LLC has successfully executed projects across diverse sectors such as oil & gas, defense, healthcare, industrial facilities, and infrastructure.

We are committed to delivering safe, efficient, and reliable solutions that strictly comply with international standards including NFPA, OSHA, CDAA, UL/FM, and ROP requirements. Backed by a team of highly qualified professionals, Middle East Wealth's LLC continues to be a trusted partner for fire safety and engineering excellence in the Sultanate of Oman.

BRISTOL

Bristol Fire Engineering Industries

Integrated Engineering Solutions (IES), part of the Concorde-Corodex Group (CCG), was established in Oman to provide advanced solutions in Firefighting, Rescue & Safety Equipment, as well as Water and Wastewater Treatment and Environmental Technologies.

Our Safety and Rescue Division supplies a wide range of equipment including:

- Fire suits, helmets, and safety footwear
- Portable fire hoses and mist systems
- Ventilators and training simulators
- Breathing apparatus and gas detection systems
- Hydraulic rescue tools and flashlights
- Fire suppression systems and foam proportioning units
- Storage banks, rescue-response vehicles, and firefighting vehicles

We are proud to host Relyon Nutec at our stand—global leaders in safety, emergency response, and crisis management training for the offshore, maritime, and wind industries. Also represented is the Bristol Vehicles Manufacturing Division (VMD), located in ICAD, Abu Dhabi, specializing in the design and production of commercial and specialized vehicle bodies. With a 20,000 sqm facility, VMD manufactures:

- Firefighting vehicles and ambulances
- Rapid Intervention Vehicles (RIVs)
- Service and Extendable Vehicles

In addition, VMD provides premium maintenance, servicing, and refurbishment solutions. Together, IES and its partners are committed to delivering cutting-edge safety technologies and services that meet the highest standards of performance and reliability.

Priority Dispatch

For nearly 50 years, Priority Dispatch has been making an impact on Emergency Dispatch worldwide. The Priority Dispatch System is a structured Emergency Dispatch system that relies on protocols developed and researched by the International Academies of Emergency Dispatch, an organization responsible for setting the standards that tens of thousands of Emergency Dispatchers worldwide recognize and honor.

What that means for you is an ever-evolving system that provides the best care possible for your community, the best information possible for your First Responders, and the best user experience for your Emergency Dispatchers, while also offering the highest level of indemnity in the industry. The Priority Dispatch System makes a program of total quality management possible and helps you create a standards-maintaining and improvement process through its systematic approach.

GIVE YOUR FIREFIGHTERS AND MEDICAL RESPONDERS THE **ProQA®** ADVANTAGE

PRIORITIZE SAFETY BEGINNING IN THE CONTROL ROOM WITH ProQA®. ProQA software gives your Emergency Dispatchers a standardized, proven set of procedures to organize the chaos of emergency situations and deliver the right information to your firefighters and ambulance crews.

The Fire and Medical Priority Dispatch Systems include intensive training courses for all your emergency dispatchers to ensure the appropriate response (which you define locally) is sent to every call. With a median call-prioritization time of 52 seconds, ProQA optimizes safety and resource

allocation while empowering calltakers to deliver potentially life-saving instructions over the phone before responders arrive on scene.

Your firefighters and medical responders need fast and accurate information—ProQA delivers.

Learn how the world's number-one emergency dispatch software can increase the effectiveness and safety of your firefighters, ambulance crews, and communities at prioritydispatch.net.

Come see us at the show or call +1-801-363-9127.

3D Engineering Services LLC

3D Engineering Services LLC offers state-of-the-art firefighting solutions featuring the latest technologies from renowned global manufacturers. Our innovative systems include aerosol-based fire suppression technology, which provides a clean, efficient, and eco-

friendly method to extinguish fires quickly without causing damage to equipment or the environment.

The aerosol gas system works by interrupting the chemical chain reaction of combustion, making it ideal for protecting electrical rooms, data centers, control panels, engine compartments, and enclosed spaces where traditional water- or foam-based systems are unsuitable.

In addition to aerosol systems, we provide a full range of Aerosol suppression solutions, Fire Blanket for EV Vehicle, Lithium Batteries and more, designed to meet international safety standards. Our team of expert engineers ensures complete support—from design and installation to testing, commissioning, and maintenance—offering customized protection tailored to each client’s needs. 3D Engineering Services is dedicated to delivering cutting-edge fire protection technologies that ensure safety, reliability, and peace of mind for all applications.

ATDI

ATDI is a global leader in RF planning and spectrum management solutions, supporting emergency services, critical infrastructure, and smart city deployments. ATDI will showcase their flagship technical engineering software HTZ Communications, designed to address the growing challenges of interoperability, spectrum congestion, and system integration across fire, police, ambulance, and civil defence networks. As cities adopt smart public safety technologies, emergency service providers face increased pressure to ensure seamless, interference-free communication in complex environments. Key challenges include spectrum congestion affecting TETRA, LTE, and VHF/UHF systems; co-site interference between radios, cameras, and telemetry; and the continued reliance on legacy infrastructure. HTZ Communications enables detailed RF planning, interference analysis, and coverage simulation for mission-critical networks in urban and industrial environments. The tool supports indoor and terrain modelling for tunnels, refineries, and high-rises, and simulates real-world scenarios using drive test data. It also resolves cross-system interference and supports coordinated deployment planning across multiple agencies. With HTZ Communications, ATDI helps government, security and emergency services achieve interoperability, efficiency, and resilience, empowering them to respond effectively in today's high-demand environments. Visit us at OFSEC to learn how ATDI can enhance your communications network planning.

High Tower Engineering

High Tower Engineering (HTE) – Oman's Trusted Engineering Partner

High Tower Engineering LLC (HTE) is a leading Oman-based technical solutions provider, specializing in compressed air systems, pneumatics, instrumentation, process

automation, and valve technologies. With branches in Muscat, Sohar, and Salalah, we ensure nationwide coverage supported by a team of over 17 skilled engineers in service, automation, and technical sales.

We proudly represent a portfolio of globally recognized brands, including Nardi , ALUP and Mark for compressors, SMC and Norgren for pneumatics, IFM, JUMO, and Supmea for instrumentation, and OMAL, Mival, and TTV for advanced valve solutions. These partnerships enable us to deliver reliable, high-quality products backed by strong local service and after-sales support.

HTE has built strong relationships with key players across multiple sectors, including OQ, Oman LNG, NAMA, Veolia, Sohar Aluminum, Jindal Shadeed, Mazoon Dairy , Royal Air Force , Royal Yachts , and Ministry of defense and. Our track record includes supporting mission-critical projects in water & wastewater, oil & gas, and industrial manufacturing, where safety, efficiency, and reliability are paramount.

At HTE, we combine global expertise with local presence to provide end-to-end solutions – from sourcing and supply to installation, commissioning, and lifecycle support – making us a trusted partner in Oman's industrial growth.

Hytrans Systems

For over 35 years Hytrans Systems develops and manufactures mobile water transport systems based on hydraulically driven submersible pumps. Offering high-flow capacities of up to 50.000 lpm and high-operating pressure over long distances and altitudes.

Our systems are used by fire brigades, civil defense, petro-chemical and nuclear industries worldwide to :

- extinguish small to large fires
- reduce the aftermath of large-scale floods
- create high volume water supply when cooling water is required.

The Hytrans mobile water transport system consist of:

EXHIBITORS

- HydroSub units with hydraulically-driven submersible pumps
- HoseLayerContainers to store and lay-out hoses at speeds up to 40 km/h
- HoseRecoveryUnits to retrieve fast and safe
- FloodPumps for rapid-response flood control
- Portable Monitors for high performance and large throw ranges
- Hardware to easily create an aboveground water distribution network
- Hose Ramps to maintain an uninterrupted flow while ensuring safe crossings.

Quick deployment:

- Our systems are designed to use in extreme circumstances and deploy in minutes using minimum manpower. Quality, proven performance worldwide and continuous innovation are the keywords that contribute our success. Because when it comes to emergency situations you need to rely on your equipment. Always. In any situation.

Ibri United Ent. LLC

iBuild is a building materials specialist with a team of professionals focused on supplying products for commercial construction projects, concrete pre-cast and ready-mix industries, metal and plastic fabrication industries, and factories involved in manufacturing processes.

Their decades of experience, and international support system allow them to meet material requirements effectively. Their dedication to customer service, after-sale support, and consultation services and similar value offerings have established them as a preferred choice among clients in various countries.

Their extensive product portfolio includes advanced offerings such as Leister Plastic Welding machines including hot air blowers and welding machines from Switzerland, Macstroc professional Metal & HDPE Pipe Working tools, and Kaizen high-performance blades. They also provide reliable Diager drill bits from France, high-quality diamond discs from Samedia in Germany, and a range of tools from Yato in Poland. VSM Abrasives leads the abrasive market, while Linktech Engineering supplies coated stainless steel and galvanized manhole steps. iBuild offers HDPE and PVC liners, precast concrete construction accessories, material testing equipment, plastic welding accessories, power tools from various brands, and general construction materials. The list serves as a glimpse of their offerings, and further details can be found on their website www.ibuildutd.com

جمعية المهندسين العمالية
Oman Society of Engineers

Oman Society of Engineers

Oman Society of Engineers (OSE) is a non-governmental and not-for-profit organization established in 2001 by Ministerial Decision No. 186/200.

OSE seeks to advance all matters related to engineers and engineering profession

which ultimately contributes to the development of Oman. OSE is an umbrella for all engineering disciplines and both Omani and expatriate engineers working in Oman. Our main sources of revenue are the training programs and other activities as well as sponsorship. We aim to contribute to the industrial and architectural development of Oman through regulating engineering practices, supporting the needs and rights of engineers, strengthening the scientific and technical ties between engineers in Oman, GCC and globally.

OSE plays a significant role in bringing an environment of networking at which engineers can exchange knowledge and stay updated with the latest research and technologies in different engineering disciplines.

OSE internationally accredited training programs help engineers to improve their management and technical skills and advance their career through professional development.

OSE organizes and hosts engineering events that bring together engineers from all countries to discuss various topics related to the engineering profession. Engineering events is a great opportunity for the engineers to continue learning and networking to stay up to date with the latest cutting-edge advance in the engineering profession.

Power Zone Electrical Equipment Trading LLC

Power Zone Electrical Equipment, in collaboration with Nemtek South Africa, Optima (Ülgen)-Turkey, and I2V Systems - India, is proud to present a world-class lineup of security and access-control technologies at the upcoming

exhibition.

Nemtek SA, a trusted name in electric fencing for over 30 years, delivers complete perimeter protection systems – including energizers, brackets, insulators, and monitoring accessories – engineered for durability and performance in the most demanding environments.

Optima (Ülgen), based in Turkey, is a global manufacturer of high-security physical barriers such as road blockers, bollards, turnstiles, and access gates. With installations in more than 50 countries, Optima's crash-tested and IoT-enabled systems set the benchmark for safety and reliability in airports, military bases, government facilities, and smart-city projects.

These products cater to projects of every scale – from residential and commercial developments to industrial and infrastructure installations.

About RAMCRO Cables – Made in Italy

RAMCRO S.p.A., founded in 1979 in Italy, is a family-owned company (Croci Family) with over 46 years of expertise in manufacturing special cables. Today, RAMCRO stands as a globally trusted brand, serving key industries including Oil & Gas, Fire Safety, Railway Signal & Control, Building Management Systems (BMS), and Optical Fiber Networks.

Product Excellence

RAMCRO Fire-Resistant Cables (RAMFIRECRO-F3) are approved by Oman Civil Defense, BASEC, UL, and LPCB, and are manufactured in accordance with major international standards such as BS 6387 (CWZ), BS 7629, IEC 60331-21, EN 50200 (PHI20), BS 8434-2, and IEC 60332-1 & 3.

RAMCRO's BMS and Control Cables cover a wide range of applications including Audio & Video, Paired, Multicore, RS485/RS422/RS232, KNX, Security, and Industrial Cables, produced in compliance with EN 50290-2, IEC 60228, IEC 60332-1 & 3, IEC 60754-1 & 2, and IEC 61034. RAMCRO's Instrumentation Cables are widely used in petrochemical plants, fertilizer industries, cement factories, steel plants, oil & gas fields, and power generation facilities, conforming to international standards such as EN 50288-7, EN

EXHIBITORS

60228, EN 50288-1, HD 383, EN 50290-2, IEC 60331-1, and IEC 60332-3-24.

Project Presence

RAMCRO cables have been successfully supplied to numerous prestigious projects across Oman, the GCC, and worldwide, including government buildings, hospitals, schools, malls, oil fields, five-star hotels, resorts, ports, factories, and commercial complexes – consistently delivering safety, reliability, and superior performance.

Safir Al Majd LLC

SAFIR AL MAJD LLC is the principal holding company and promoter of SAMCO Group Companies, SAMCO is a multi-disciplinary total solution provider having main stream of business in Infrastructure Solutions, Engineering & Technologies, Our Offerings FIRE SYSTEMS,

AUTOMATION SYSTEMS & SECURITY SYSTEMS.

Safir Unique Technology

Promotion of high-rise buildings at the metropolises that lead to increasing need to an efficient and modern fire-fighting fleet. Among the factors that have driven the fire extinguishing process towards the use of unmanned aerial vehicles equipped with a variety of optical

and electromechanical sensors in order to significantly improve accuracy, safety and operational power, the following items can be listed:

- Restrictions on the use of fire ladders in different areas
- The high price of the ladder in the required number
- Limitation of access to fire at different heights and spaces
- The possibility of irreparable damage to the expert firefighter during the operation

Samara United

Samara Training Institute is one of the leading Omani Institutes provides Prestigious International and local certified courses in HSE, Operation and Maintenance as well as Softskills. It's a privately-owned Omani Institute licensed by The Ministry of Higher Education, in Sultanate

of Oman and has a branch in Iraq- Basra. Our primary business is in the provision of HSE Courses, Occupational Health, as well as Risk Management Training Programs, in addition to some technical specialized courses in both Arabic and English languages. We have clients both local in the Sultanate of Oman and regionally in the Middle East. In addition to Training Services, Samara Institute prides itself on quality services in the field of Consultancy and Technical Translation services to very wide range of sectors, such as oil and gas, manufacturing and logistics. It is a recognized and approved training provider from international awarding bodies such as NEBOSH, IOSH, IIRSM, Highfield and OSHAcademy. Our team of in-house and associate experts has a collective experience of more than 200 years, working in industry and delivering quality training solutions and consultancy.
